Steve-

What do you think of this comment from Mike M:

General: It seems that a possible alternative that wasn't considered was a low permeability barrier along the eastern boundary with PRBs located on the northern and southern boundaries of the site. The costs and implementation would be similar, but it would also provide containment for the soils component and may also address the hydraulic control needed to maintain equilibrium. To ignore containment of soils along the eastern side of the site is to discount the impact of any effort to reduce contamination on the Harbor side of the boundary.

Steve, Mike and Robert-

EPA intends to transmit comment on the Aerovox Phase III RAP to MassDEP by COB September 9, 2016. Please review and get me comments on the document by COB September 8, 2016 so that I can consolidate comments to get to the DEP on the 9th. Our comments should be limited to matters related to the impact of the alternatives evaluated and the elements of the selected alternative on the Superfund cleanup and/or impacts to the harbor - i.e., generally our comments should relate to concerns or questions related to the OU3 remedial alternatives and OU3 selected alternative. I do not want to send DEP voluminous comments so please attempt to focus comments on significant concerns and issues. Thanks.

Kim Tisa may be issuing TSCA related comments on the Phase III directly to AVX.
